

Model Year 2008

Fuel Economy Guide

This guide provides MPG estimates for vehicles offered for sale early in the 2008 model year. The complete list of estimates for 2008 vehicles will be available in October 2007.

EPA recently changed its method for estimating MPG, so these estimates are not compatible with estimates for 2007 and earlier vehicles. Revised estimates for older vehicles that are compatible with the estimates provided here can be found at www.fueleconomy.gov. Consumers are encouraged to visit www.fueleconomy.gov for more information. The complete list of estimates for 2008 vehicles will be available in October 2007.

Alternative fuel vehicles are highlighted with an orange bar, and those that can use two kinds of fuel, such as flexible fuel vehicles, have an entry for each fuel type. Annual fuel cost is estimated assuming 15,000 miles of travel each year (55% city and 45% highway) and an average fuel cost of \$2.63 per gallon for E85, \$2.80 per gallon for regular unleaded gasoline, \$3.00 per gallon for premium unleaded gasoline, and \$2.89 per gallon for diesel.
